L05 Exercise

Ex1

1-D advection equation solved using F-T B-S scheme with $NX = 601$, $c = 15\text{m/s}$, $\Delta x = 1\text{km}$, $\Delta t = 30$ seconds.

Ex2

a)

1-D advection equation solved using F-T B-S scheme with $NX = 601$, $c = -15\text{m/s}$, $\Delta x = 1\text{km}$, $\Delta t = 30$ seconds. It starts blowing up at $n = 1$.

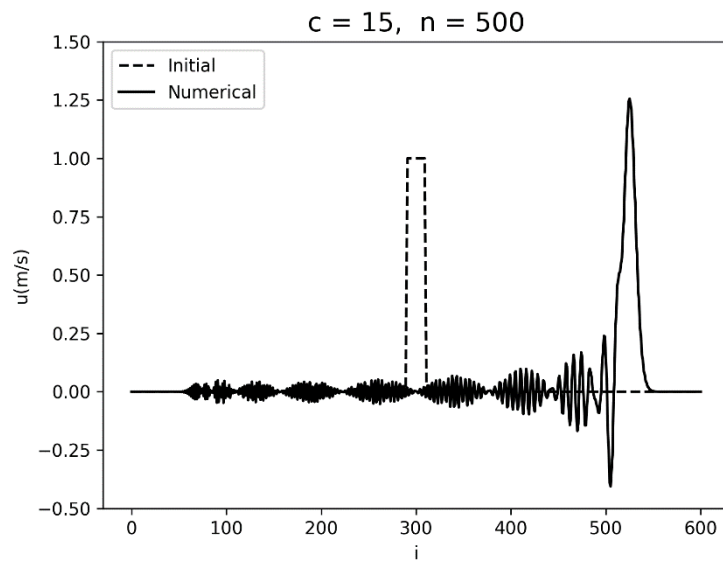

b)

1-D advection equation solved using F-T B-S scheme with $NX = 601$, $c = 50\text{m/s}$ (exceeds CFL condition), $\Delta x = 1\text{km}$, $\Delta t = 30$ seconds. It starts blowing up at $n = 1$.

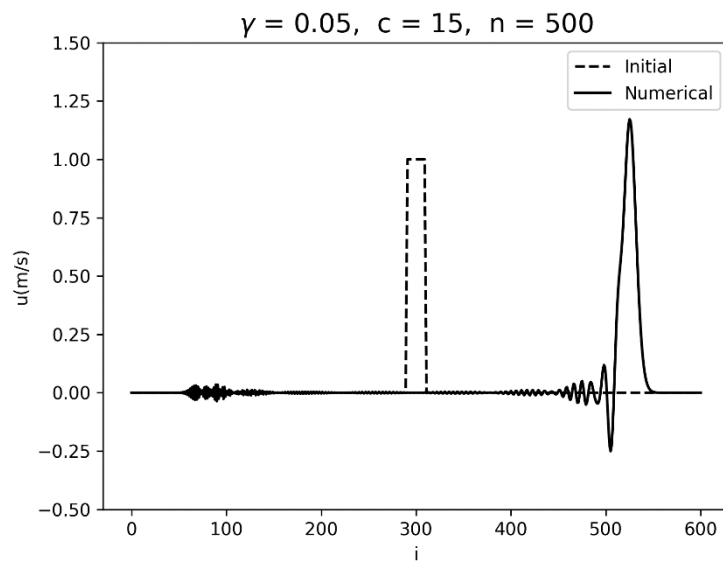

Ex3

1-D advection equation solved using leapfrog scheme with $NX = 601$, $c = 15\text{m/s}$, $\Delta x = 1\text{km}$, $\Delta t = 30$ seconds.

Ex4

Added Asselin-Roberts time filter with factor value 0.05.

Added Asselin-Roberts time filter with factor value 0.2.

Added Asselin-Roberts time filter with factor value 0.5.
